Technical Data Sheet SchraubenDoktor/ ViscoGrip

<u>Description</u>	Product is in the form of a pa tools and screws by as much Using SchraubenDoktor gen tightening/untightening a scr and on damaged or worn scr	as 500%. erally improves the torqu rew, particularly on screw	e-application when
<u>Properties</u>	 easy to use, works instantly works instantly, is not a glu increases friction-contact u suitable for overhead work very productive, just 1 or 2 can be stored for up to 3 ye not harmful to skin or the e 	ne, does not need to harde p to 5-fold , no dripping drops are required ears provided tube is well	
Technical Data	water based product extremely hard crystals in b colour : grey/green consistency : paste shelf-life : min. 3 years, Protect from	provided tube is well close	sed
<u>Applications</u>	SchraubenDoktor generally improves torque-application and reduces the power required, by creating a positive Grip between tool and screw. It also reduces the risk of damaging screws and driver/bit. It considerably prolongs the lifetime of tools. Particularly suitable for use on damaged/worn screwheads or for screws which are difficult to access. When used on bits with cordless drivers it reduces the ratcheting-over effect considerably. SchraubenDoktor can be use with all types of screws, such as: Slotted, Philips, Pozi, Torx and Hexagonal screwheads.		
<u>How to apply</u>	Shake tube well before application. One or two drops into head of screw or tip of driver/bit. Apply tool several times with light pressure to ensure even spread. Then apply good torque and pressure. Avoid eye contact. Keep away from children.		
Container/Tube	SchraubenDoktor Made in Germany	20 Gramm Tube Patented	Item-No.: 44 44 0000
