

Brake Pipe Wrench with Ratcheting Function, 10x11 mm (Art. 1722)

PRO+

- ring ends with **ratcheting function**
- both sides have a flexible ring end
- **rings can be opened to fit around a pipe**
- an internal spring ensures the ring closes securely around the nut
- the more pressure you put on the tools in driving direction, the tighter the head closes around the nut; this prevents slipping over the nut
- wrench holds the long sides of the nut and not its corners, therefore it works also on nuts with damaged corners

Technical modifications reserved - we are not responsible for issues while printing
