

2K Special Adhesive METALL, 10g (Art. 80615)

**PRO +**

- for elastic and vibration-absorbing gluing
- drip-free
- extremely impact resistant
- mechanically editable
- best adhesion properties on e.g. metals, many plastics, steel, aluminum, stainless steel, rubber, porous / absorbent materials
- overhead and vertical application
- good chemical resistance
- colour: grey
- mixing ratio: 4:1, self-mixing by mixing tube
- processing time: approx. 35 min.
- temperature resistance: -20°C to +80°C, shortly up to +120°C
- processing temperature: from -25°C
- gap filling capacity: up to 6 mm
- breaking elongation: 200%
- incl. 3 mixing tubes, can be ordered separately
