

Professional vacuum cleaner for workshops

YT-85715

A professional vacuum cleaner for use at construction sites, woodworking shops and paint shops. It meets the highest standards when it comes to removal of minor contaminations, such as plaster dust and dust from broadleaf tree wood (oak, ash).

- power that allows long time of working
- multi-step filtration system
- stepless power adjustment
- can be used for dry and wet cleaning
- power supply socket for power tools with automatic start function
- leaf blower function, which is also useful for cleaning the carpenter tools of dust and removing dirt from places that are difficult to access
- manual filter shaker (button)
- can be used with or without a bag
- cable with length of 5 m
- the set included a reusable fabric bag
