

## Turbo blow guns

Guns for blowing with compressed air with a turbo-nozzle, strengthening air exhaust. They are perfect for removal of contaminants, dust and mud from machines, devices and engines as well as for cooling down and drying different types of surface. Ideal for use in professional services.

- turbo-nozzle increasing the air exhaust force
- pressure control by means of a trigger
- made of resistant plastic
- maximum working pressure: 0.62 MPa
- standard connection

**0.62**  
MPa  
(max.)

**TURBO**  
**NOZZLE**

  
STANDARD

### YT-23723

- nozzle length: 110 mm
- extended tip makes it possible to get to hard to reach places

### YT-23722

- nozzle length: 45 mm
