

## Tile leveling pliers

04699

20-70  
mm

Pliers designed for precise leveling of ceramic tiles. In a control way, three press plastic wedges and cause that tiles rise to the desired level.

- made of thick steel sheet
- intended for floor and wall tiles
- thanks to a large adjustment range, they can cooperate with different leveling systems
- they significantly accelerate the process of tile placement and they facilitate the achievement of desired results
- protected against corrosion
- ergonomic polypropylene handles
