

Pipe and drain cleaning coil

Drum coils for unblocking sewer pipes using a drill or drill-driver. They enable effective removal of any blockages, including those impossible to remove by chemicals. Particularly useful in the event of blockages causing complete clogging of drains.

- rotary motion using a drill or drill-driver and manual sliding motion
- coil made of galvanized spring wire ensures long-term effectiveness in shredding and crushing the resulting blockages
- recommended for use in households as well as by professionals in plumbing services, water supply plants, technical emergency services
- ergonomic handle (YT-24991)
