

## Compression tester

YT-73011

A five-part set for measuring the compression pressure in spark-ignition engines.  
Recommended for car and mechanical services.

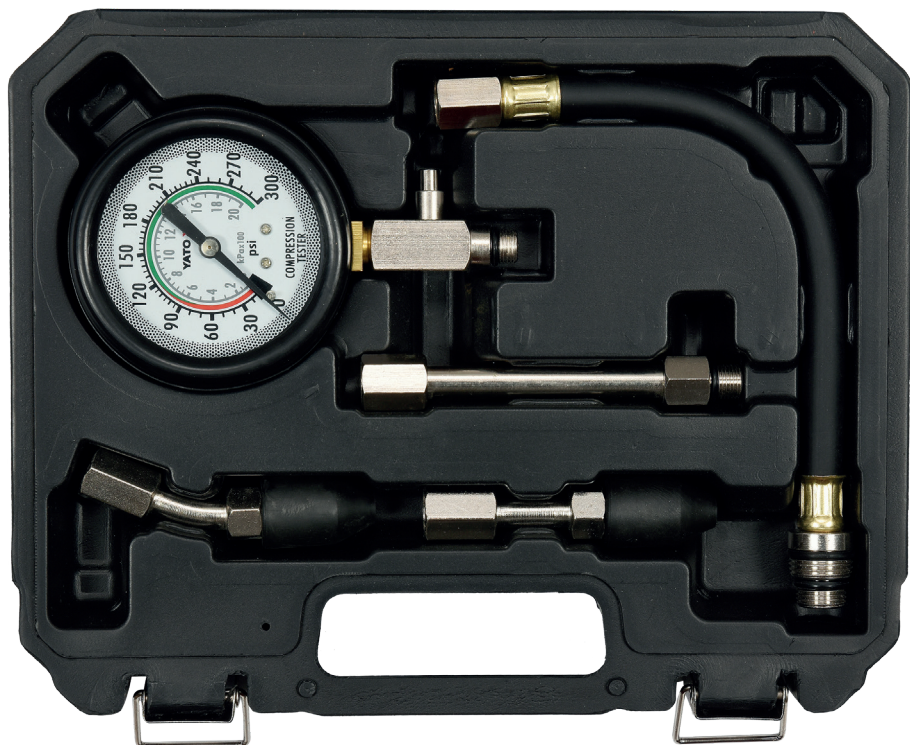

- 300 psi (21 bar) manometer
- two rubber conical endings to seal the spark plug socket, and a ending to screw in the spark plug socket (M14 and M18)
- packed in a handy suitcase

2.1  
MPa

FOR  
SPARK  
IGNITION

RUBBER  
CONNECTOR

M14  
M18

- for all types of spark plugs
