

## Brake fluid tester

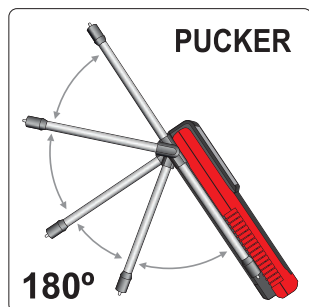

YT-72981

4  
LED

BUZZER

It allows one to quickly check the quality of the brake fluid. Designed for motorcycles, cars and trucks. Ideal for use in professional workshops as well as in the backyard garage.

- check for 3 types of liquids: DOT 3, DOT 4 and DOT 5
- optical and acoustic signalling
- 4 LEDs for easy reading of the measurement:
  - 2 green LEDs – good quality of the liquid
  - yellow LED – bad quality of the liquid
  - red LED + acoustic signal – liquid not apt for use
- calibration of the device without opening the cover
- the calibration knob on the front panel
- additionally, on the cover liquid temperature scale

The amount of water in the brake fluid above 3% is dangerous – the braking system may not work.
