

Demolition hammer

YT-82001

Recommended for heavy applications – demolition and dismantling works. It is perfect for demolishing concrete and reinforced concrete as well as forging in asphalt. A short piston stroke with a large diameter ensures a strong impact without transferring the reaction to the user.

- powerful engine and high impact energy 65 J
- 1900 strokes/min
- oil cooling (SAE OW30) eliminates the risk of overheating
- suitable for continuous operation (has a switch lock)
- anti-vibration handle
- metal, adjustable side handle
- HEX type holder
- thick rubber cable 3 m
- packed in a solid, metal suitcase
- flat chisel and spike included
