

Saws

Hand saws for cutting wood and wood-like materials, such as plywood, chipboard, MDF.

- blade made of steel sheet with manganese addition (Mn 65) with high resistance to abrasion and deformation
- blade surface covered with a PTFE layer to reduce friction during cutting
- three-sided teeth for aggressive, effective cutting in both directions
- high sheet stiffness and teeth with 7 TPI pitch for effective, fast and precise cutting
- blade thickness: 1 mm
- a wooden handle covered with rubber protection
- a profiled handle for shaping the cut material at 45° and 90° angles

65Mn		7TPI
------	--	------

PTFE	45°	90°
------	-----	-----

3 cutting edges, 60% faster cutting

without jamming

YATO	(mm)
