

UV 100 LED flashlight and glasses

YT-08582

UV flashlight intended for the diagnosis of car air conditioning system using a contrast agent. Used when prospecting amber and other minerals which react to UV light, for reading inscriptions made with UV paint, detecting animal urine stains, and for testing banknotes.

- 100 LED UV provides strong radiant flux that helps to detect leaks
- the set includes glasses protecting against UV radiation that meet the requirement of European Directive on Personal Protective Equipment
- precisely selected length of UV waves (395 nm) for clearly visible contrast detection
- aluminium body
- dimensions: 195 x 78 mm
- practical hanger
- power supply: 6 x AA
